Smart Tooling Receives \$2.633M Contract From A&P Technology

10/4/2019 (Xenia – OH) Smart Tooling received a \$2.633 million contract from A&P Technology as a part of their \$8.9 million contract with The Air Force Research Laboratory for the Design for Manufacture of Attritable Aircraft Primary Structure program.

The contract is for the design and fabrication of low-cost and high-rate compatible composite aircraft structural components leveraging novel materials and methods of manufacture.

[A&P Technology](#) is a seventh-generation, family-owned, world-leading producer of precision braided textiles.

[Smart Tooling](#) provides formable, reusable tooling solutions for manufacturing composite parts with complex geometries for the aerospace & defense industry. Smart Tools improve quality, reduce labor hours, decrease consumables, and increase throughput – essentially, Smart Tools enable the manufacturing of composite parts better, cheaper, and faster.
